Dear HR,

I am writing to express my interest in the Backend Developer position at Uniswitch Technology Limited. With a solid foundation in back-end development, I am confident in my ability to contribute to your team by delivering scalable, high-quality applications that meet user needs.

In my experience as a developer, I have built and maintained web applications using modern frameworks such as Laravel, and ExpressJS on the back-end. I have worked on web3 products, FinTech products and AI products. I am skilled in designing and optimizing database solutions, including MongoDB, SQL and PostgreSQL, to ensure performance and responsiveness. Writing clean code and implementing design patterns helps make my code easily readable and maintainable.

Some of my key skills include:

- Developing and maintaining RESTful APIs to support dynamic front-end experiences.
- Building intuitive and responsive user interfaces to enhance customer satisfaction.
- Collaborating with cross-functional teams to deliver features that align with business goals.
- Debugging and troubleshooting applications to ensure optimal performance.
- Writing tests to ensure quality.

I am particularly impressed by Uniswitch's contribution to seamless payments in Nigeria.. Joining your team would allow me to apply my technical expertise and creativity to further your mission.

Thank you for considering my application. I would welcome the opportunity to discuss how my skills and experience align with your needs. I look forward to the possibility of contributing to your team's success.

Sincerely,

Idowu Daniel
